

LT80

Semi-automatic desk top
print & apply labeller

(Minimum label size 25mm² - Maximum label size 100mm²)

Vacuum is generated through an electric fan system without the use of pneumatics making the machine ideal for stand alone operation in warehouse or retail outlets.

The **LT80** can be used on desktops, as a full work station or mounted over a conveyor for labelling boxes or soft packaging.

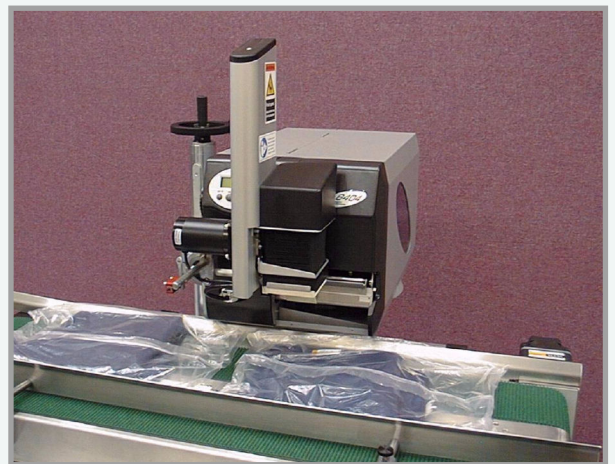

SELF ADHESIVE
LABELLING
SOLUTIONS

The **LT80** print & apply labelling machine prints self adhesive labels and then applies them to a wide range of products.

Labels are printed via label generation software and dispensed onto a foam vacuum pad. The pad moves down and applies the label to the product waiting in the adjustable jig.

The **LT80** is unique in its operation having touch sensitive application with no possibility of harm to the operator.
